PANEL CONTROL

GRAPHIC MAPS FOR BENTEL ABSOLUTA*

**Try Panel Control
Download the trial from
<http://www.panelcontrol.eu/>**

***Panel Control works only if the Absoluta panel is configured with the IP board**

PANEL CONTROL: the Absoluta supervisor

Panel Control is the supervision software to manage *Bentel Absoluta* panels.

It allows to upload *graphic maps* on multiple levels and to *manage* in a simple and intuitive way the alarm *events* and the *status* of the panels and their components.

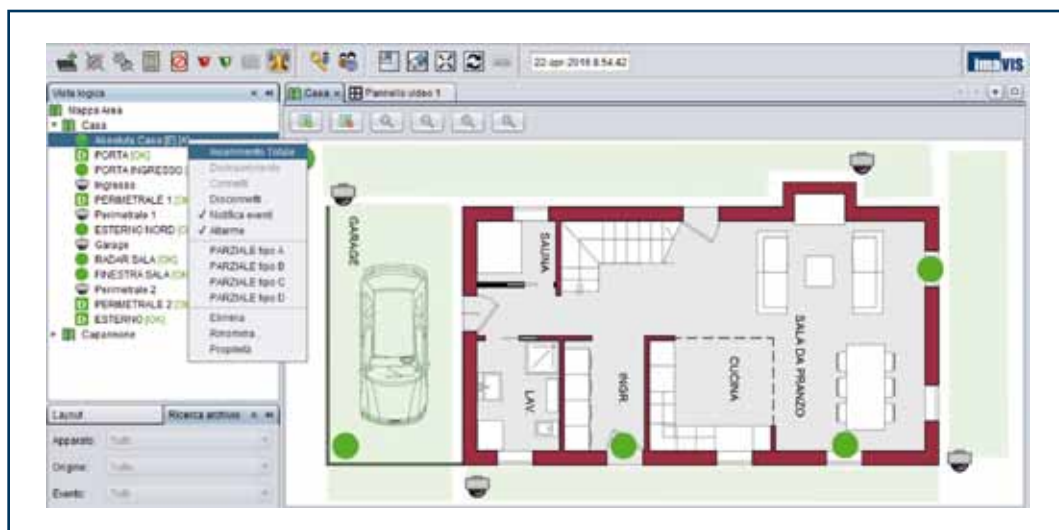

It is possible *to add* video components (network cameras, DVR and NVR) for an *integrated control* of intrusion and videosurveillance systems; together with the management of *live* events, the user can *search* for recorded events in the *archives* of *Bentel* panels and *DVRs*.

FEATURES

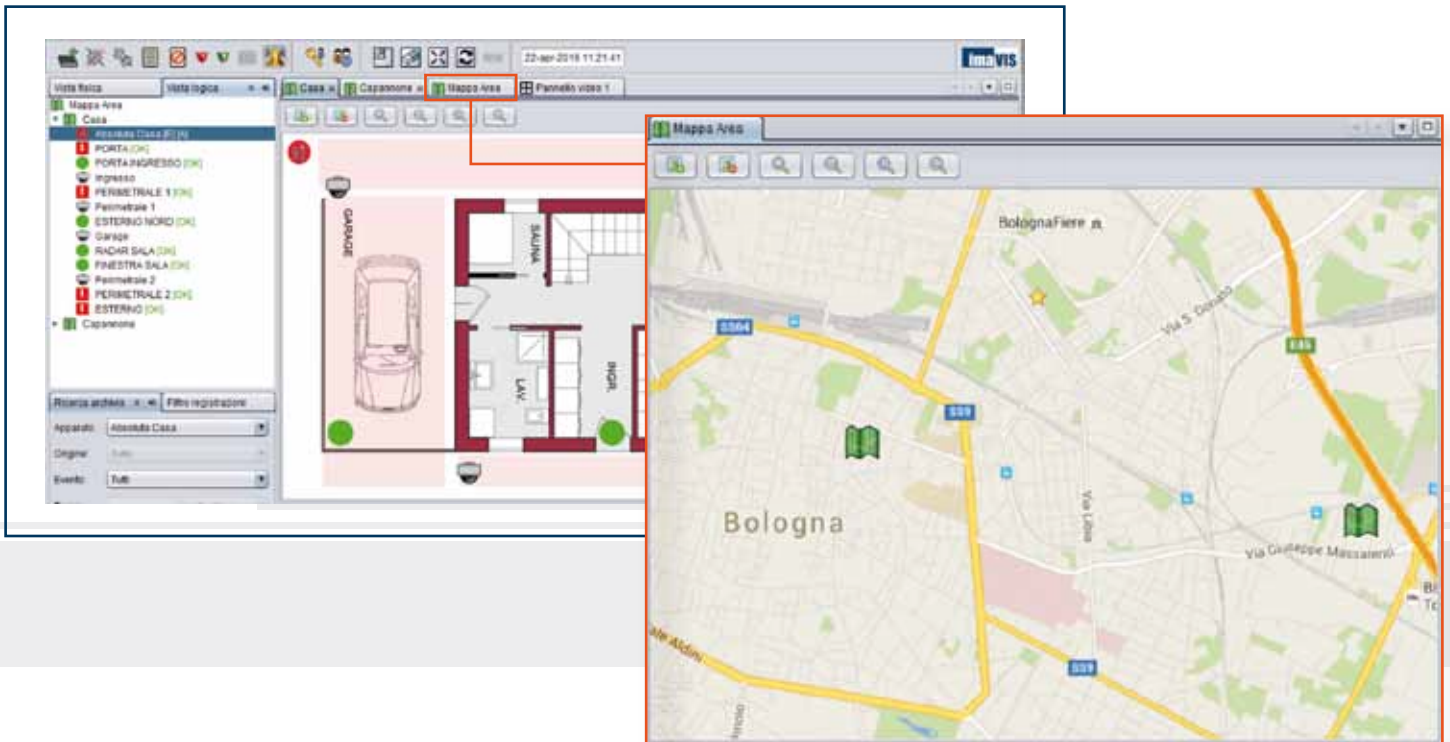

👁 System supervision

- Absoluta panels management from PC
- Centralization of multiple systems even if located in distant geographical areas
- Automatic configurations load
- Total or partial arming, disarming and bypass

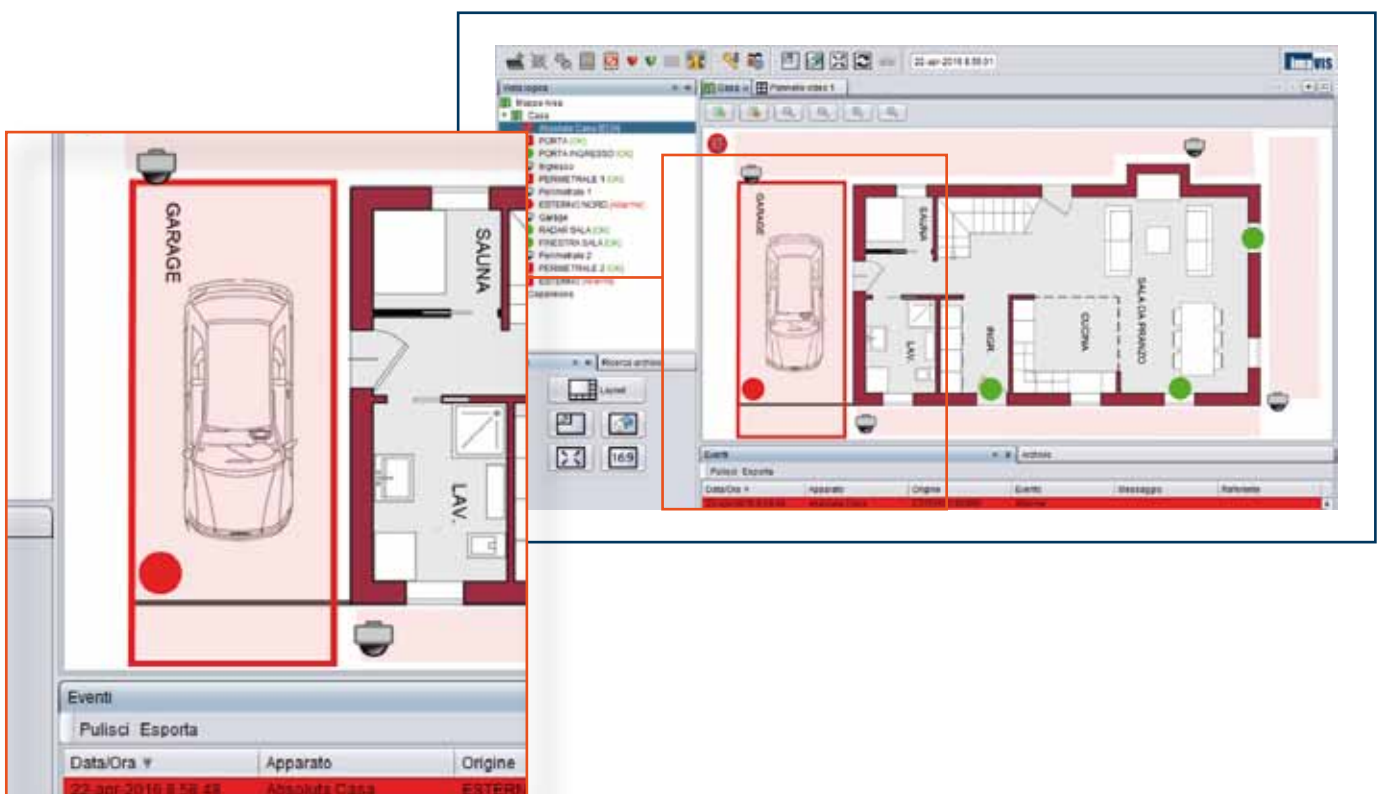

📖 Maps management

- Multilevel maps
- Tree structure with physical and logical view
- Zones identification through icons
- Zones representation through free form polygons

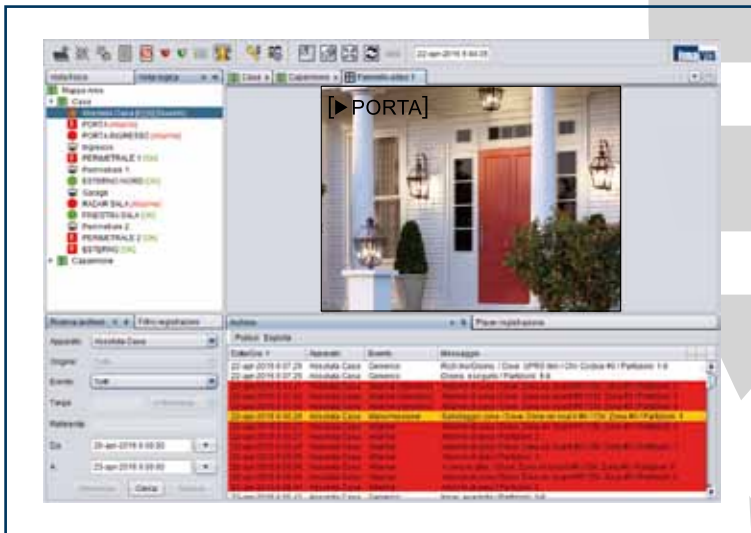

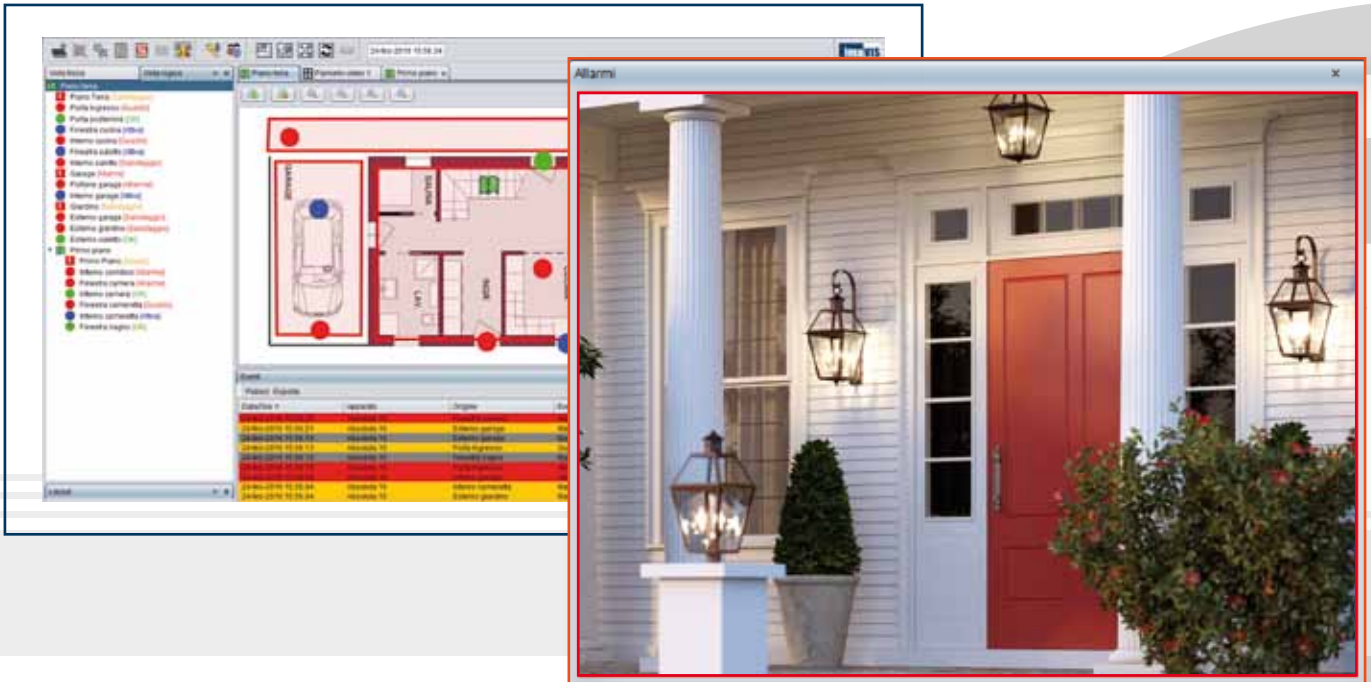

⚙️ Events management

- Real time events control: alarms, tampering and faults
- Bypasses, status changes and disconnections/reconnections alerts
- Persistent faults and tampering highlights
- Events visualization on tree structure and on the map with color changes and blinkings

Video management

- Camera real time visualization on the video panel
- Recorded alarms video play
- Camera - zones association
- Automatic video live in case of alarm
- Positioning of the cameras icons on the map

Events and recordings history

- Search interface on the Absoluta panel events log based on date, time and events type
- Video play linked to the event zone
- Search interface on the DVR recordings with timeline
